| **AUSTEMPERED HEAT TREATMENT**               | - Austempered sickle sections are made up of substantially tougher, longer lasting material that has proven less chipping, fewer broken sections and noticeably less wear  
- Unique process that involves through-hardening the entire section, versus competitors only heat-treating the cutting portion  
- Substantial lab and field testing confirm worry free harvesting performance                                                                 |
| **FINE SECTION SERRATIONS**                 | - 14 serrations per inch  
- Provides optimal cutting characteristics in green forage, high moisture and hay crops  
- Delivers a clean cut, increasing efficiency and decreasing horsepower demand during harvest  
  *Crops: Forage, Grasses, Flax and Lentils* |
| **COARSE SECTION SERRATIONS**               | - 9 serrations per inch  
- Provides optimal balance of durability and cutting edge technology in thick stem crops  
- Recommended use for on the ground applications, coarse sickle sections hold their cutting edge longer in these high debris conditions  
  *Crops: Wheat, Soybeans, Canola, Cereals and Pulses* |
| **HIGH PERFORMANCE CUTTING EDGE**           | - Designed to self sharpen as they wear, meaning your sickle sections will continue to stay sharp throughout the section life                                                                                     |
| **PRECISION SPACING AND FIT**               | - Guaranteed hole spacing means your replacement sickle section will fit your MacDon perfectly every time, inconsistently spaced holes lead to premature bolt failure costing valuable downtime  
- Best fit paired with your MacDon guards                                                                                                           |
| **DISTINCTIVE MACDON AUSTEMPERED SECTION LOGO AND PACKAGE** | - Distinctive MacDon box assures you of MacDon Austempered sickle sections  
- Only the MacDon logo guarantees that it’s original                                                                                                |
