FITS AGCO - GLEANER

Cutter Bar Components

- Saves wear on sickle sections.
- Quiets mower & extends sickle life.
- Allows increased cutting speed.
- High carbon steel spring holds sickle sections against ledger plates for improved cutting.
- Replaceable "Nylatron" wear strip.
- Fully plated to prevent rust.
- No adjustment necessary for wear.

Exclusive "Snap-Action" Release
A "flip of the lever" releases pressure for removing Sickle Bar!

Pick-Up Guards

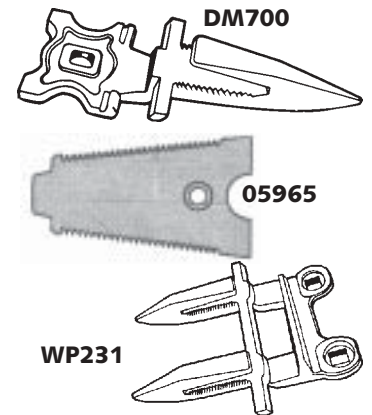

USE THESE STURDY, FIELD-TESTED GUARDS TO REDUCE HARVESTING LOSS.

PART NUMBER	MANUFACTURER	DESCRIPTION	APPLICATION
GUA 4S	Herschel	Tiger Jaw Guard	All Tiger Jaw Applications, Combines
GUA 8B	Allis Chalmers	Gateman Guard	Combines, windrowers, binders & mowers having vertically bolted sickle guards that stand rather level

Malleable & Forged Steel Guards

PART NO.	REPLACES	HERSCHEL NO.	DESCRIPTION	APPLICATION
GUA DM700	70804072	G81-0803	One prong malleable guard	For mowers 3,4,5,B,WC,7,80
CUT 04021	70802500	G81-0805	One prong malleable guard	(RH) (DM700R) for mowers 3,4,5,B,WC,7,80
CUT 05965	-	P44-0667	Ledger plate	For DM700 guard
CUT 01003	-	-	1 1/4 x 6 CS ledger plate rivet	For DM700 - 1/2 lb. box
GUA WP225	71116504	G81-0050	Two prong forged guard	For combines Rigid A,C,E,R,T,G,F & N
GUA WP231	71176532 71320143	G81-0125	Two prong forged guard	For combines floating bar series 1 & 2
GUA WP66603	66603		Two prong forged guard heavy duty	For Gleaner Combines with draper headers

WP Grain Lifter

- Manufactured by European OEM manufacturer ensuring quality material & workmanship
- Universal design fits most swather and combine applications up to and including 7/16" guard bolts
- Painted black to reduce eye strain

Note: Above sickles all have bolted overlaps.

For the same knives only with Extra Heavy Sections — see page 15-23.

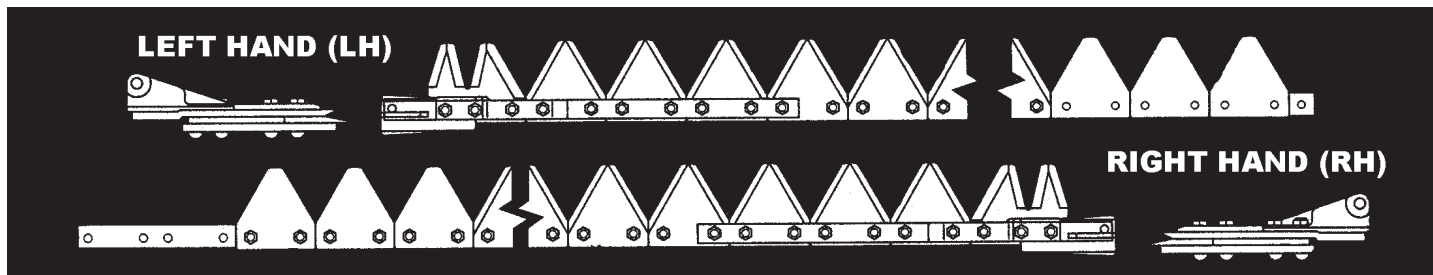

Coarse Serration Profile

With ten serrations per inch, **Big Tooth Sickle Sections** are best suited for medium to coarse stemmed crops. Their serration profile is aggressive enough to grab and hold dryer, large-stemmed stalks, yet fine enough to cut all but the most delicate grasses.

GUA GS2

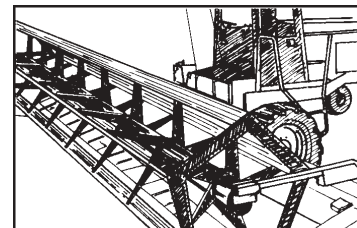

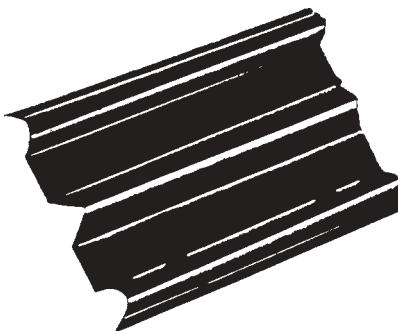

Swather & Combine Reel Bats

The reel bat is designed for combines and swathers. It is also ideal for many other applications. It is made by roll forming .031" wipe coat galvanized steel which has a matte grey appearance. It can be painted easily if desired.

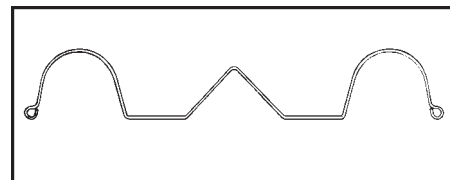

MUST BE CUT AND DRILLED TO CUSTOMER'S SPECIFICATIONS. FOR ALL POPULAR MAKES.

PART NUMBER	DESCRIPTION
CUT 09008	21' reel bat
CUT 09004	21' reel bat painted black*
CUT 09009	22' reel bat
CUT 09005	22' reel bat painted black*

CUT 09006	25' reel bat painted black*
CUT 09011	30' reel bat
CUT 09007	30' reel bat painted black*

*Painted reel bats manufactured by HCC

Reel bat used for swather.

Reel bat profile.

Gateman Pick-Up Guards

Flexible floating pick-up guards follow the uneven ground lifting up low hanging pods and grain heads above the cutterbar without the sickle guards digging in the ground and picking up stones. While automatic header controls, floating and flexible cutterbars have advantages over regular cuttrbars, pick-up guards must be used to save all pods and grain heads in standing, row crop, lodged or windrowed crops. Gateman pick-up guards fit all combines, windrowers and pea harvesters.

Use No. 1A or 8A pick-up guards on combines having guards that tilt downward.

Use No. 1B or 8B pick-up guards on all windrowers, combines, floating and flexible cutterbars having sickle guards that stand level.

With 6 position adjustments for swathers and combines equipped with 3/8" guard bolts.

PART NUMBER	HEIGHT	MATERIAL
GUA 1A	Adjustable	Pressed Metal
GUA 8A	Adjustable	Ductile Iron
GUA 1B	Adjustable	Pressed Metal
GUA 8B	Adjustable	Ductile Iron

The No. 4H guard fits windrowers and some combines. It features adjustable height.

The No. 4B guard is lower in overall height and can be used in lodged crops on windrowers, pea harvesters, forage harvesters, and mowers.

To fit swathers and combines equipped with 7/16" guard bolts.

PART NUMBER	HEIGHT	MATERIAL
GUA 4B	Low Standing	Ductile Iron
GUA 4H	Adjustable	Ductile Iron
GUA 2HC	Adjustable	Ductile Iron

The No. 2HC guard fits all combines and windrowers. Its heavy duty malleable iron construction double bolted to machine, instant height control, spring loaded and radically new designed pick-up point make it ideal for all usage.

The No. 4S is designed to fit combines equipped with 1 1/2" cut stub guards. Use this sturdy, field tested ductile iron guard to reduce harvesting loss of soybeans, rice, grain, and other seed crops. It has a set screw height adjustment, non-clogging spring action joint and is double bolted to the cutterbar.

Fits swather and combines with stub guards.

PART NUMBER	HEIGHT	MATERIAL
GUA 4S	Adjustable	Ductile Iron

Black is the best finish choice for most Standard Serration applications today. The self-sharpening properties of our top-serrated sections and the high carbon content of the black steel create a section that is extremely durable, even when not plated. A chrome plated Standard Serration section may resist gumming under certain conditions, however black is less expensive than chrome and is more environmentally friendly.

LS = Spliced Knife Assemblies.

Extra Coarse Serration Profile

With seven serrations per inch the most aggressive in the industry, these Sickle Sections are best suited for coarse stemmed crops and dry cutting conditions. Their aggressive serration profile is designed to grab and hold dryer, large-stemmed stalks, cutting them cleanly and efficiently.

Sickle Sections

Extra Coarse Serration Profile

With seven serrations per inch the most aggressive in the industry, these Sickle Sections are best suited for coarse stemmed crops and dry cutting conditions. Their aggressive serration profile is designed to grab and hold dryer, large-stemmed stalks, cutting them cleanly and efficiently.

WP Grain Lifter

- Manufactured by European OEM manufacturer ensuring quality material & workmanship
- Universal design fits most swather and combine applications up to and including 7/16" guard bolts
- Painted black to reduce eye strain

PART NO.
GUA GS2

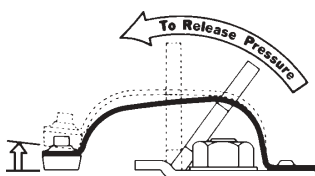

Sic-L-Clips

- Saves wear on sickle sections.
- Quiets mower & extends sickle life.
- Allows increased cutting speed.
- High carbon steel spring holds sickle sections against ledger plates for improved cutting.
- Replaceable "Nylatron" wear strip.
- Fully plated to prevent rust.
- No adjustment necessary for wear.

PART NO.	REPLACES	DESCRIPTION
CUT 03006	SLC-330	Standard model for 3/8" bolts

These sickles use a countersunk fastener.

Coarse Serration Profile

With ten serrations per inch, **Big Tooth Sickle Sections** are best suited for medium to coarse stemmed crops. Their serration profile is aggressive enough to grab and hold dryer, large-stemmed stalks, yet fine enough to cut all but the most delicate grasses.

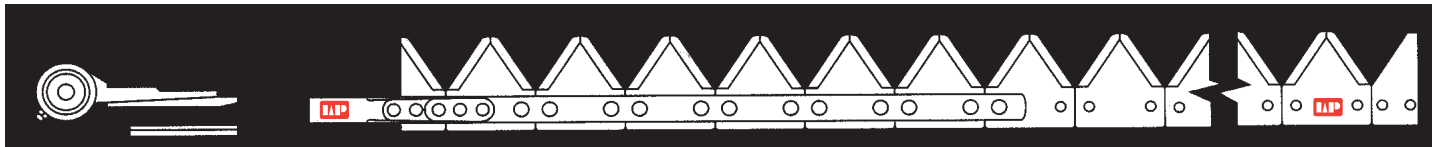

BIG TOOTH/BLACK

Sic-L-Clips

- Saves wear on sickle sections.
- Quiets mower & extends sickle life.
- Allows increased cutting speed.
- High carbon steel spring holds sickle sections against ledger plates for improved cutting.
- Replaceable "Nylatron" wear strip.
- Fully plated to prevent rust.
- No adjustment necessary for wear.

PART NO.	REPLACES	DESCRIPTION

Westward Universal Grass Board

ORDER NUMBER	DESCRIPTION	REPLACEMENT FOR
CUT 04001	Steel Grass Board	Designed to work on Deere, Ford, IHC, Kosch, M-F, and N-I Mowers, Adjustable Steel Rods

**EXTRA COARSE SERRATION PROFILE**

With seven serrations per inch, the most aggressive in the industry, these Sickles Sections are best suited for coarse stemmed crops and dry cutting conditions. Their aggressive serration profile is designed to grab and hold dryer, large-stemmed stalks, cutting them cleanly and efficiently.

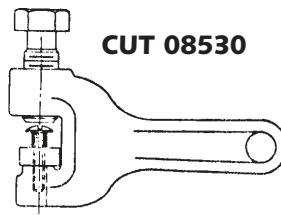

**Rivet Vise for Sickles****COMBINATION RIVET PUNCH AND RIVETER CHANGES SECTIONS IN THE FIELD WITHOUT REMOVING KNIFE!**

Item	Part Number	Replaces	Description
	CUT 08500	RV-10	Combination rivet punch & riveter

COARSE SERRATION PROFILE

With ten serrations per inch, **Big Tooth Sickle Sections** are best suited for medium to coarse stemmed crops.

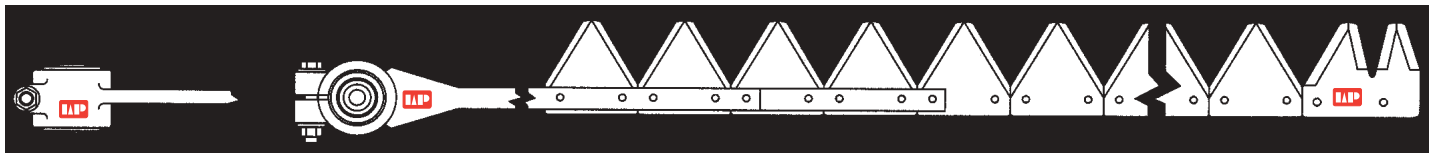

Their serration profile is aggressive enough to grab and hold dryer, large-stemmed stalks, yet fine enough to cut all but the most delicate grasses.

Sickle Assemblies

Knife Repair Kits

TO REPAIR A BROKEN SICKLE, FOLLOW THESE RECOMMENDED INSTRUCTIONS

PART NUMBER	DESCRIPTION	KIT CONTENTS
CUT 08086	Kit for assemblies with 2-1/16" hole spacing	1 instruction card, 1 allen wrench, hardware
CUT 08087	Kit for assemblies with 2-1/8" hole spacing	1 instruction card, 1 allen wrench, hardware
CUT 08088	Kit for assemblies with 2" hole spacing	1 instruction card, 1 allen wrench, hardware
CUT 08089	Nut & Bolt Kit for Spliced Area	

Will mend most broken sickles. Breaks near the head of the sickle can be moved to the tall end with the kit. Some drilling may be required to mount the knifehead in new positions.

Universal End Sections

DESIGNED TO REPLACE THE HALF-SECTIONS ON MOST SICKLES

End Sections are made of one-piece high carbon, heat-treated steel for rugged use. They are punched with an oblong hole to virtually fit any standard cutterbar mower in use today. To install our "End Section", simply take off the last section on the shoe end of your sickle assembly and replace it with an "End Section". The change-over takes only a couple of minutes to complete and you will notice a big difference in time saved from unclogging your mower. We recommend using a 5/8" x 5 1/2" oval head rivet or CUT 01100 bolt.

Extra Coarse Serration Profile

With seven serrations per inch the most aggressive in the industry, these Sickle Sections are best suited for coarse stemmed crops and dry cutting conditions. Their aggressive serration profile is designed to grab and hold dryer, large-stemmed stalks, cutting them cleanly and efficiently.

Sickle Sections

**SW1776****SW1616**

Section engineered with special hole to accommodate our special bolt, and made from heavy gauge steel for longer life.
(VS1616BN & VS1776BN)

Knifeback punched with oval hole to accept oval shouldered bolt. Prevents bolt from turning.

TYPE OF SECTION

SM = Smooth

SS = Super 7 (7 serrations/inch) top serrated

BT = Big Tooth (10 serrations/inch)

ST = Saber Tooth (7 serrations/inch)

US = Under Serrated

TS = Top Serrated (14 serrations/inch)

TT = Tiger Tooth

TP = Twin Point

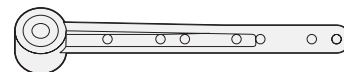

TJ = Tiger Jaw

CTSK = Countersunk

**Oval Bolt-On Fasteners**

Special grade 8 bolts with oval punched knife back.
Cannot be used with standard round hole knifeback.

Section engineered with special hole to accommodate our special bolt, and made from heavy gauge steel for longer life. (VS1616BN & VS1776BN)

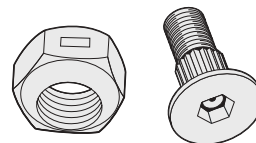

Knifeback punched with oval hole to accept oval shouldered bolt. Prevents bolt from turning.

PART NO.	REPLACES	DESCRIPTION
CUT 01105	VB55BN	Section bolt w/nut (pkg. 100) to fit Westward Parts Versatile Sickles
CUT 01106	VB75BN	Head bolt w/nut (pkg. 25) to fit Westward Parts Versatile Sections
CUT 01107	TJ224N	Replacement Lock Nut (each)

Note: These parts cannot be used on standard Versatile sickles. They are designed for use with our special designed Bolted Versatile sickles.

WP Grain Lifter

- Manufactured by European OEM manufacturer ensuring quality material & workmanship.
- Universal design fits most swather and combine applications up to and including 7/16" guard bolts.
- Painted black to reduce eye strain.

PART NO.
GUA GS2

- The Grain Lifter is properly adjusted when the sliding surface is parallel to bottom.
- Too steep a Grain Lifter digs into the ground and is bound to break.
- Too flat a Grain Lifter overruns the grain and does not serve the intended purpose.
- Correct Grain Lifter position by adjusting distance at points shown, using suitable elements (e.g. nuts, washers, etc.)

Croplifters

Height-adjustable lifters with quick change feature.

Standard Croplifter (AS Series)

Several million of these croplifters are in use throughout the world.

Almost all combine harvester manufacturers fit this croplifter as original equipment.

AS - Standard Series

We recommend this type for normal harvesting conditions.

Special Croplifter (SK Series)

A croplifter with support skid, having a load bearing capacity of approximately 50 kg. (110 lbs.)

The design of the skid enables the lifter to move parallel with the contours

of the ground when under load and carries the cutter bar evenly over rough surfaces.

SK - Special Series

A croplifter for difficult harvesting conditions.

General Information

All the croplifters pictured here are made of heat treated spring-steel with 5mm thick bottom runner. The riveted guard pocket clamps the guard on both sides and thus gives the lifter excellent lateral stability.

This is absolutely essential when turning in lodged crops.

The locking clip can secure the croplifter at three different heights.

This is particularly important when working in conditions that alter the angle of the cutterbar.

A spool nut secures all three croplifter types.

Our unique mounting bracket allows the croplifter

to be put on or taken off in seconds.

Spool GUA2040

The croplifter "climbs"

Incorrect position
The croplifter "digs"

What size croplifter is right for you?

To find the size of croplifter for your needs, please measure the distance from the center of the guard bolt hole to the tip of the guard, and you can select a lifter from below.

All AS and SK lifters are priced & shipped with 2040 spool nut.

Only order GUA 2040 if extra spool nuts are required.

Exception AS100-2 uses GUA SNII spool nut (10256).

Standard Series Lifter for use on all lodged crops.

Special Series lifter for more difficult conditions including canola and peas.

Gateman Pick-up Guards

Flexible Floating Pick-up Guards

follow the uneven ground lifting up low hanging pods and grain heads above the cutterbar without the sickle guards digging in the ground and picking up stones.

While automatic header controls, floating and flexible cutterbars have advantages over regular cutterbars, pick-up guards must be used to save all pods and grain heads in standing, row crop, lodged or windrowed crops.

Gateman pick-up guards fit all combines, windrowers and pea harvesters.

Use **No. 1A** or **8A** pick-up guards on combines having guards that tilt downward.

Use **No. 1B** or **8B** pick-up guards on all windrowers, combines, floating and flexible cutterbars having sickle guards that stand level.

The **No. 4S** guard is designed to fit combines equipped with 1½" cut stub guards. Use this sturdy, field tested ductile iron guard to reduce harvesting loss of soybeans, rice, grain, and other seed crops. It has a set screw height adjustment, non-clogging spring action joint and is double bolted to the cutterbar.

The **No. 4H** guard fits windrowers and some combines. It features adjustable height.

The **No. 4B** guard is lower in overall height and can be used in lodged crops on windrowers, pea harvesters, forage harvesters, and mowers.

The **No. 2HC** guard fits all combines and windrowers. It's heavy duty malleable iron construction double bolted to machine, instant height control, spring loaded and radically new designed pick-up point make it ideal for all usage.

With 6 position adjustments for swathers and combines equipped with 3/8" guard bolts ...

"Slick Willy" Skid Shoes

Slick Willy skid shoes are custom made for a variety of manufacturer models of haybine, swather, and combine headers. Skid plates are made from Durable Virgin UHMW.

UHMW is a polyethylene plastic providing good wear resistance, high impact strength and excellent abrasion resistance.

"Slick Willy" UHMW Skid Shoes

- Improve header performance in wet, sticky soils
- Extend shoe life in sandy, abrasive soils
- Eliminates soil build up
- Are a cost effective alternative to steel skid shoes

Skid Shoes are available for most manufacturers and models of haybines, swathers, and combines.

Skid shoe "kits" include:

- 1/4" UHMW material to cover the entire width
- End plates (if required)
- Steel Pop Rivets

The "Slick Willy" skid shoes are pop riveted to the existing metal skid shoes. Pop rivets are placed every 8 inches and the heads are counter sunk into the poly skid shoe to extend the life of the pop rivets. The skid shoes are bent to match the existing profile of the steel skid plates to ensure a good fit.

"Slick Willy" Skid Shoes

SCHUMACHER EASY CUT CUTTER BAR KITS

Fits most Combines, Swathers and Mower Conditioners.

Kits include all parts to convert to the EASYCUT system, including one pre-assembled knife with knifehead (less knifehead bearing) all guards and hardware, plus ten extra replacement sections with hardware and two extra guards. Note: Speed adjustment of the cutterbar may be necessary to achieve optimum performance.

When ordering kits with Rollers, please use a "R".
When ordering kits with wear plates use a "U".

FUNCTIONS AND BENEFITS

Advantage of the sectional knife in comparison to one-piece and riveted knives:

EASY REPAIR

Easy handling of short sections. Connector bar fits anywhere on the knife back! No further processing of connecting points on knife back. Conical screw hole: Force-fit joint guaranteed.

SAVE PARTS

Quick and easy repairing.

SAVE SPACE

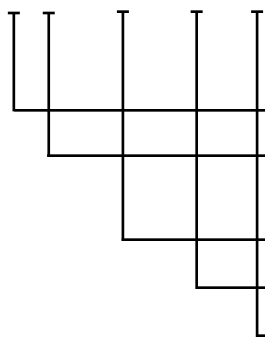

Reduced need of spare parts.

SAVE MONEY

Save time repairing - it's time to harvest!

Ordering Example:

R_JD_900_15_RK U = dashes R = underscore

U or R - (U= Wearplates, R= Rollers) If ordering "U" kit there is no dash between the "U" and the manufacturer code.

MFG - (AG, CASE, CAT, CCIL, FORD, GEHL, HESS, HB, JD, MCD, MF, NH, NI, VERS)

Model Number

Length (Feet)

FK or RK - FK (Flex)= 7 serrations per inch sections

- RK (Rigid)= 12 serrations per inch sections

SCHUMACHER PARTS

Schumacher Knife Only Ordering

What part number do I need?

All knives start with a full knife section or half section on the knifehead end.
Series A knives start with a half-section. Series B knives start with a full-section.

We recommend 7 teeth per inch for soybeans and 12 teeth per inch for wheat.

Use what works best for your particular crop. There is no rule.

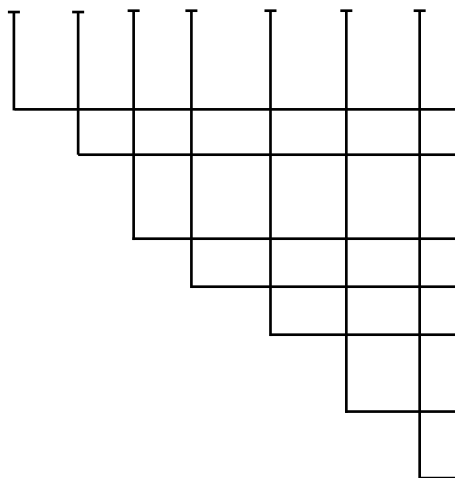

All knives come with sections that are 7 teeth per inch,
unless you order a kit with 045 series knives.

The 045 series knives have 12 teeth per inch sections.

If the kit calls for 045 series knives,
please order this when ordering a replacement knife.
In some cases, you will have to trim the tail end of the knife
to fit your applications.

Part Description for SCH Knives

U SCH-A-DD-045-10-KNIFE

U = Build

SCH = Schumacher Knife

A or B = starts w/ full or half section

DD = Double Drive (If DD is not listed, this is a single drive knife)

045 = 12 teeth per inch sections

(If 045 is not listed, the knife uses 7 teeth per inch sections)

10' = Length of knife

Knife = Knife

CUT 15449	SCH Roller Guide 4-Hole 5mm
CUT 15450	SCH Roller Guide 4-Hole 6mm

SCH Bridge Roller

FUNCTIONS & BENEFITS

F: Less knifeback wear and breakage
B: Save parts & money

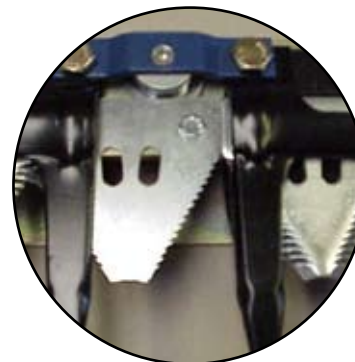

F: Reduction of drive force
B: Save fuel

F: Less platform vibration
B: Efficient cutting, drive faster

F: Less weight
B: Save fuel

F: Easier knife insertion
B: Save time

F: Less friction
B: Nonstop harvesting

Guards

PART NUMBER	DESCRIPTION
GUA WP001	Guard 12 mm (Black) (WP616) (10616.04)
CUT 10619.01	Guard 14 mm (Red)
CUT 10628.01	Guard 17mm (Grey)
CUT 10681.01	First Guard 14mm
CUT 10682.01	First Guard 17mm
CUT 10683.03	First Guard 12mm
CUT 10697.02	First Guard 12mm Open
CUT 10698.01	First Guard 14mm Open
CUT 10699.01	First Guard 17mm Open
CUT 10717.05	Triple Guard 12mm
CUT 10719.01	Triple Guard 14mm
CUT 10722.01	Triple Guard 17mm
CUT 10637.03	Center Guard 12mm Open Top for Double Drive
CUT 10638.01	Center Guard 14mm Open Top for Double Drive
CUT 10639.01	Center Guard 17mm Open Top for Double Drive
CUT 82817	Cutter Bar Poly for MCD

BENEFITS

Less wear. Less weight. Easy handling. Blockage-free use. Increased stability. Smooth knife move. Extended endurance. Suitable for sectional knives. Discharge of knife drive.

Procut Knife Sections

PART NUMBER	DESCRIPTION
CUT 05193	Pro-Cut Section Reg Serration (TS BT CR) (10961.07)
CUT 05189	Pro-Cut Section Reg Serration (TS BT) (10961.07)
CUT 05031	Pro-Cut Section 7-Inch Coarse (TS SS CR) (10978.04)
CUT 05192	Pro-Cut Section 7-Inch Coarse (TS SS) (10978.04)
CUT 13935.01	Half Section
CUT 10987.02	Pro-Cut Countersunk Section 7-Inch for Double Drive
CUT 10954.02	Pro-Cut Countersunk Section for Double Drive
CUT 10961.80	Pro-Cut Section Reg Serration
CUT 10978.80	Pro-Cut Section 7-Inch Coarse
CUT 80502	10 Coarse Pro-Cut Sections, 20 Nuts & Bolts
CUT 80504	10 Pack Regular Sections with nuts & bolts
CUT 14529.01	Section & a Half
CUT 16223.01	Countersunk Section for Double Drive

BENEFITS

Sections do not bend. Less weight. Less wear of guards. Balances cutting forces. Easy mounting and repairing. Perfectly suitable for Easy Cut cutting system.

SCHUMACHER PARTS

Hardware

PART NUMBER	DESCRIPTION
CUT 01153	6 mm Flange Nut (13961)
CUT 01150	6 mm Section Bolt (10931)
CUT 01160	6 mm x 16 mm w/12mm Head Countersunk Section Bolt (10044)

Knifeheads

PART NUMBER	DESCRIPTION
To fit AGCO	
CUT 11195	Knifehead 300 Series Early Model Flex Head
CUT 11222.10	Knifehead 3/4" Thread 400, 500 and 800 series Flex & Rigid
CUT 11252	Knifehead Generation 3, Series 2
CUT 13997.10	Knifehead 7/8" Thread 800 Series Flex & Rigid
To fit CCIL	
CUT 11256	Knifehead 722
To fit CIH	
CUT 14266	Knifehead 1010 Rigid & 1020 Flex Head
CUT 11226	Knifehead AC-Crank, Combine 820 Floating
CUT 11227	Knifehead 820 Flex Head
CUT 11252	Knifehead 810 Floating 4 1/4" from Bearing Center
CUT 11185	Knifehead Windrower Model 4000
CUT 11213	Knifehead 2020 Flex Head LH
CUT 11214	Knifehead 2020 Flex Head RH
CUT 81367	Knifehead Draper 2062
CUT 11229	Knifehead Windrower Model 1275
CUT 15474	Knifehead Windrower 8000 Series & 8820LH
CUT 11186	Knifehead 1590 MC
CUT 15475	Knifehead 8820 RH
To fit HESSTON	
CUT 15474	Knifehead MC 1160 & 8200
CUT 14534	Knifehead MC 1085, 1090, 1091, 1095, 1150, 6665 LH
CUT 14535	Knifehead MC 1150, 6665 RH
CUT 83616	Knifehead MC 1170, 8400 LH
CUT 83617	Knifehead MC 1170, 8400 RH
CUT 11229	Knifehead MC 1014, 6600
CUT 11258	Knifehead MC PT10
To fit HONEYBEE	
CUT 14226	Knifehead Left Hand
CUT 14227	Knifehead Right Hand
CUT 04090	Bearing Only (HB#26258) (10258)
To fit JOHN DEERE	
CUT 15421	Knifehead 600 Series Hydroflex
CUT 11207	Knifehead 200 through 900 Flex Series
CUT 11220	Knifehead MC Ball Joint Style Serial #285,000
CUT 14067	Knifehead Auger 230-240, MC 1380, 1424, 1600LH
CUT 14068	Knifehead MC 1600 RH
CUT 11196	Knifehead MC Bushing Style 1219
CUT 81352	Knifehead Draper 925, 930, 936
CUT 14066	Knifehead 2360
CUT 12360	Knifehead Seal

SCHUMACHER PARTS

Knifeheads

PART NUMBER	DESCRIPTION
To fit MACDON	
CUT 83669.1	Knifehead MC 4000
CUT 81367	Knifehead 973 with Bearing
CUT 81368	Knifehead 973R with Bearing
CUT 14066	Knifehead 973 Early Model 910, 920, 960, 7000 w/bearing
CUT 14069	Knifehead 972 with Bearing & DDLH
CUT 14070	Knifehead 972 w/bearing DDRH
CUT 11254	Knifehead 973 Early Model 910, 920, 960, 7000 w/o bearing
CUT 12360	Knifehead Seal
To fit MASSEY	
CUT 11236	Knifehead MC 925
CUT 81362	Knifehead 220 Retro-Fit
CUT 81363	Knifehead Draper 220
CUT 14066	Knifehead Draper 885
CUT 11188	Knifehead Draper 655, 675, 775 & 785
CUT 11255	Knifehead Rotary 8560, 8920, 9520, 9750 & 9300 Series.
CUT 11222.01	Knifehead Windrower 3850
CUT 11220	Knifehead Windrower 775
CUT 11126	Knifehead Combine 8450, 8460 20' or more No Bearing
CUT 11300	Knifehead Bearing for above head
To fit NEW HOLLAND	
CUT 11213	Knifehead 970 Series Left-hand
CUT 11214	Knifehead 970 Series Right-hand
CUT 11191	Knifehead MC 474, 489, 492
CUT 11219	Knifehead MC 469
CUT 11192	Knifehead MC 477, 479, 488
CUT 11224	Knifehead MC 495
CUT 11276	Knifehead Windrower 1116 LH
CUT 11277	Knifehead Windrower 1116 RH
CUT 83614	Knifehead Windrower 2450, 2550 LH
CUT 83615	Knifehead Windrower 2450, 2550 RH
To fit OWATONNA	
CUT 11280	Knifehead
To fit VERSATILE	
CUT 11193	Knifehead 400
CUT 01161	Knifehead 4700 (62885)
CUT 11217	Knifehead 4400
To fit SCH PRODRIVE	
CUT 11341	Knifehead Conversion Drive
CUT 12543	Plastic Ring for Knifehead
CUT 12766	Knifehead Bearing Block Assy w/Plastic Ring

SCHUMACHER REFERENCE

This list shows most of the machines that we can retrofit. You can cross reference the parts (guards, spacer bars & knifehead) that fits the machines listed below.
