

LED Work Lights, Flashlights, Headlamps & Pocket Knives

Since the very beginning, Coast Products has made innovations that make people's lives easier and jobs safer. They are still at it. It all started with a salmon fillet knife on Oregon's coastline. And today it's world-class LED optical technology and pocket tools. One thing has never changed: COAST innovations are trusted tough!

CL20R Work Light

Put light anywhere you need it. The COAST CL20R Clamp Light takes precision task lighting to an all-new level with multiple positioning options enabled by its high-strength clamp. Outfitted with a Wide Angle Flood Beam to provide a broad sweep of flawless light at 1750 lumens, the clamp on this versatile go-anywhere work light attaches firmly to a wide variety of supports—from ladders to pipes to branches. The clamp also doubles as a dynamic stand, or you can use the integrated magnetic base for attachment to metal surfaces. Once in place, the light rotates up to 360 degrees and tilts up to 115 degrees for the ultimate in lighting control. Engineered with the COAST Dual Power system, the rechargeable CL20R runs on a built-in COAST ZITHION™ battery. In addition to the ZITHION™ Rechargeable battery, the CL20R can also be continuously run using standard AC/DC power. To continuously run the Clamp Light, plug the USB-C cable (included) into the Clamp Light and plug the cable into an available power source, then turn the light on. While in a continuous run, the CL20R will operate at a single setting at a reduced level. The clamp light will not charge while in continuous run mode and must be turned off to fully charge. A battery life indicator ensures you know when more power is needed, and the battery also doubles as a power bank for external devices. Constructed of top-grade materials, the CL20R is rated IP54 for water resistance.

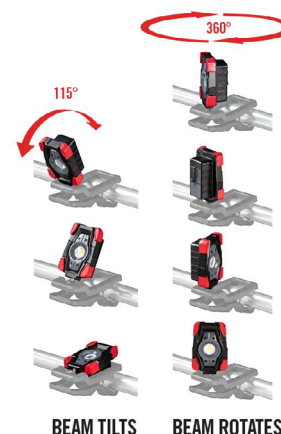

- Utility Beam C.O.B.
- 1750 Lumens Bright
- 196 Ft. Range
- 16 Hour Run Time
- IP54 Dust Resistant/Storm Proof
- Includes Coast Zithion-X™ Rechargeable Battery
- Dual Power - Also includes AC Power In for Continuous Run

Pocket Knives

At Coast, each knife begins as an idea and then gets put to paper. But it can't go to production from just that, so each concept is carefully turned into a hand-carved wood handle to test the ergonomics, size, and aesthetics.

After we are confident with the hand done model, we put it back to paper to create a 3D rapid prototype model it gets to put it to the test for form and function. Once we are satisfied that the original idea has passed all the inspections and qualifications to become an official Coast knife, it gets put to full production and finds its way to your hands.

Just because your knife went through all of these hurdles and steps to get to your hand, does not mean the Knife Lab gets to turn the lights off. Every blade in the collection is scrutinized continuously to make sure that it has reached its maximum potential.

Just another reason that Coast Knives are FASTER, SMOOTHER, SAFER

Frame-Lock Folding Knife

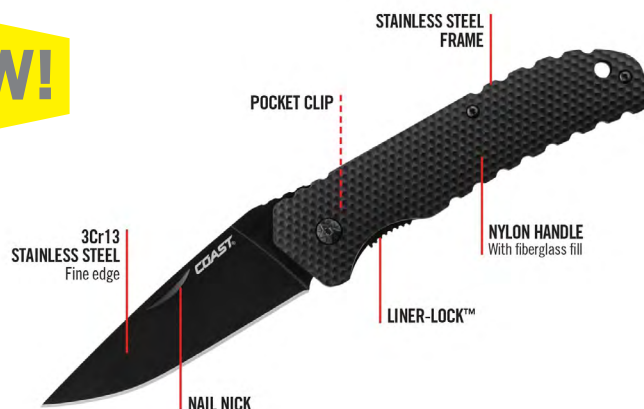

- 2" (5.1 cm) Blade Length
- 5.4" (13.7 cm) Overall Length
- Stainless Steel Frame
- 3Cr13 Stainless Steel Fine Edge
